

FIERRO BINDERY SYSTEM

COIL BINDING

Coil binding is an attractive and durable binding system allowing pages to rotate in a full 360 degree making it easy to read, write, and draw. Our Coil binding is great for catalogs, proposals manuals, calendars, note books, drawing pads, etc. Some coiling systems feature a safety lock for safe handling. Paper is also available with micro perf, our perforating system for a clean and easy tear.

TAPE BINDING

This binding system consists of a heavy duty adhesive tape which allows for a durable bound which secures the pages together. Paper is also available with micro perf, our perforating system for a clean and easy tear.

GLUE BINDING

Glue binding system offers a more invisible bind to all covers and books, by gluing the out side edge of the items. It holds a durable secure finish, Paper is also available with micro perf, our perforating system for a clean and easy tear.

SIDE STITCH BINDING

Side stitching books are essentially loose sheets of paper stapled together, forming a booklet. A paper cover may be used for a more attractive look.
